

# LSDengue

Looking into Severe Dengue

## WP4

Trans-territorial network for the collection and sharing of sample and data

## WP1

Describe severe dengue cases and pinpoint clinical risk factors

## WP2

Identify and characterise new virus factors associated with severe dengue

## WP3

Identify and characterise new host factors associated with severe dengue

## WP5

Build a systemic view of the determinants of severe dengue and identify biomarkers with optimal predictive capacity

## WP6

Supervise, coordinate and create a synergy between the actors of the consortium
